SUMMARY

Computer Science Engineering graduate with expertise in AI/ML, Python, and Full-Stack Development. Published researcher in Deepfake Detection with hands-on experience building intelligent applications using Machine Learning, RAG, and modern web technologies.

SKILLS

- ❖ **Programming Languages:** Python, C, C++, HTML, CSS & JavaScript
- ❖ **Frameworks:** TensorFlow, PyTorch & React
- ❖ **AI & Data Science:** Machine Learning, Deep Learning, Computer Vision, NLP, Retrieval-Augmented Generation (RAG), Data Analysis
- ❖ **Databases:** MySQL & MongoDB
- ❖ **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, Power BI, Tableau, CI/CD
- ❖ **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Software Development Lifecycle

EDUCATION

- ❖ X (SSC) | Vidya Mandir Prashala, Miraj 88.80% | 2020
- ❖ XII (CBSE) | Anandsagar Public School & Junior College, Tasgoan 74.00% | 2022
- ❖ Computer Science Engineering | Ajeenkya D Y Patil University CGPA: 8.50 | (Aug 2022 – Jun 2026)

PUBLICATION

- ❖ **Research Publication & Conference Presentation:** Published and presented the research paper "Deepfake Recognition System" at ICSICE 2026. The research focused on leveraging deep learning and computer vision techniques to detect manipulated media and improve cybersecurity resilience.

VIRTUAL EXPERIENCE PROGRAM

- ❖ **JPMorgan Chase Software Engineering Job Simulation:** Developed a Spring Boot microservice integrated with Apache Kafka to process high-volume transaction data. Implemented transaction validation, database persistence using Spring Data JPA, REST API integration, and automated testing workflows.
- ❖ **Commonwealth Bank:** Designed data pipelines, implemented data anonymization techniques for privacy compliance, and developed structured databases for storing and analyzing large-scale social media datasets.

ACADEMIC PROJECTS

- ❖ **InsightPrep – Data Profiler**
Built a data profiling platform that automates dataset analysis, preprocessing, and visualization to accelerate data-driven decision making.
Tech Stack: Python, Pandas, Streamlit, Plotly.
- ❖ **RAG Based AI Teaching Assistant**
Developed an AI-powered Teaching Assistant using RAG architecture to deliver accurate, context-aware responses from custom knowledge bases.
Tech Stack: Python, Vector Database, LLM APIs.
- ❖ **Deepfake Recognition System**
Designed and developed a deep learning-based system for detecting manipulated media, resulting in a published research paper and conference presentation.
Tech Stack: Python, TensorFlow, OpenCV, Deep Learning.

CERTIFICATES

- ❖ **Data Science-(CodeWithHarry):** Earned a Data Science certification with hands-on training in Python, exploratory data analysis, machine learning algorithms, and real-world project implementation.
- ❖ **Quality Assurance-(Forage):** Completed a Quality Assurance certification, gaining knowledge of software testing principles, test case design, defect tracking, and ensuring software reliability and quality.
